

School Community Council
November 14, 2017

Present: Darren Johnson, Jayme Gandara, Erica Mildenhall, Megan Westbrook, Marci LeMonnier, Renea Dietrich, Justine Dorton, Melissa Peterson, Lara Mills, Heather Blinzinger, Emily Weaver

Reviewed the minutes from the last meeting. Justine motioned to approve. Melissa seconded. All approved.

Darren gave an overview of the purchase of engineering kits for our STEM enrichment class using funds laid aside in last year's land trust plan. Heather Blinzinger explained her purchasing process (especially consumables) and shared the specific curriculum packages she has bought. We discussed the need for money allocated to her in the future to continue the program, as well as other avenues of getting supplies (parent donations, etc). The PTA may choose to contribute funds from the yearly fundraiser to try to include more classroom teachers in the program. There was a large interest in finding ways to increase STEM/21st Century Learning Skills in the classrooms and include more students.

Discussed the pros and cons of using SAGE vs Dibels scores as our goal measurements for this year's plan. Marci motioned to have the wording to SAGE from Dibels, leaving the numbers the same. Lara seconded the motion. All nine council members present voted for the amendment.

Darren went over the district resources for internet safety.
