

School Community Council

October 21, 2020

Met via Zoom

Present: Rene Cunningham, Brooke Macdonald, Shane Wright, Erica Mildenhall, Renea Dietrich, Nancy Montero, Jessica Heaton, Lindsey Denning, Odily Alavarado, Nate Bryson, Jayme Gandara

Introduction of members and welcome extended to Nate Bryson, visiting school board member.

Shane nominated Nancy for Chair. Odily was nominated herself for vice-chair. Lindsey seconded.

School Community Council responsibilities were discussed according to the school land trust guidelines.

School Community Councils rules of order were reviewed.

Acadience reading results from last year were shown. We have beginning of the year and end of year results available. We compared these to this year's beginning of the year results. There were significant losses between then and now. Our school's multi-tiered system of support (MTSS) was explained, including how students were identified for intervention programs and how often those interventions were run. We analyzed some student data scores to gauge the success of our first cycle of interventions.

Rene gave an update to our STEM program. Our space lab is up and ready to run. We have hired a new STEM coordinator who is working to get things started quickly.

Shane suggested that we continue to monitor Acadience data as it comes. He also brought up our need to market ourselves and show off the great things we are doing (stats, programs, etc). Nancy suggested using our school social media more strategically. Rene proposed a question and answer or data session during SEPs to help share information. This has been effective during our PTA meetings.
